

# Sani Clean

A highly effective cleaner and disinfectant leaving a powerful clean smell.

**A neutral pH7 cleaning and disinfecting formulation, that will deep clean any surface and leave the area smelling naturally fresh.**

## What is Sani Clean?

Sani Clean is a high quality hard surface cleaner and disinfectant, with the fantastically fresh fragrance of Sea Salt and Lotus. It destroys bacteria, fungi and mildew on contact whilst cleaning away dirt and grease, leaving the area smelling radiantly clean.

Sani Clean is a safe, biodegradable and can be used to clean, disinfect and deodourise all hard surfaces in one simple step.

## How does Sani Clean work?

Sani Clean combines the unbeatable cleaning power of a broad spectrum disinfectant, with degreasers and a fresh fragrance which leaves hard surfaces spotlessly clean and hygienic. Sani Clean's effective but biodegradable formulation means it is totally safe and non-toxic, suitable for use in commercial, domestic and institutional premises.

## How do you use Sani Clean?

Sani Clean comes prepackaged in specialised Sani Clean dispensers. These are non-pressurised propellant free airless spray bottles delivering an aerosol quality spray in an eco friendly way.

The dispenser will work at any angle and will not leak, ensuring that the most difficult situations can be dealt with. Sani Clean also is packed in 1 litre refill bottles that can also be used with conventional sprayers.

Always ensure that precautionary measures found in the MSDS sheet for Sani Clean are read and followed before use.

## Key features and benefits of Sani Clean?

- Effective cleaner and degreaser for all hard surfaces.
- Broad-spectrum disinfectant removes harmful bacteria, mildew and fungi.
- Fresh fragrance destroys bad smells.
- Applied via specialist sprayers or conventional bottle sprayers.
- Refills are available separately.
- Safe and non-toxic.
- Ideal for use in public areas such as offices, hotels, changing rooms, shower blocks and schools.
- Excellent for cleaning, sanitising and re-odourising urinals and toilet blocks
- Use Sani Clean on stainless steel, plastics, ceramics, tiles, concrete and painted surfaces.

## How to get the best results?

For cleaning and disinfecting all hard surfaces, just spray a mist onto the surface, leave for a few moments and wipe off with a clean cloth or paper towel.

For disinfecting and re-odourising urinals, spray onto all surfaces and into the drains as often as required.
