Sani-Gel Toggles

Fast-acting sanitiser containing Aloe Vera in a toggle bottle on a wire

A revolutionary gel that leaves hands free of germs and bacteria whilst replenishing essential oils lost from the skin with those from the Aloe Vera plant.

What are Sani-Gel Toggles?

Sani-Gel Toggles are packets of powerful hand sanitisers which kill a wide spectrum of harmful bacteria and organisms before they have the chance to spread. The on-going threat harmful bacteria and germs pose is a major concern for any workplace, institution, or commercial property. It is essential to halt the spread of antibiotic resistant contaminants such as e-coli and MRSA and provide a safe, hygienic environment for all.

A clip and retractable wheel attachment allows the individual toggles to be carried and deployed easily for use when they are most needed.

Sani Gel Toggles contain aloe vera, known to ancient Egypt as the plant of immortality due to its healing properties.

How does Sani-Gel work?

From the moment that Sani-Gel is applied to the hands it goes to work on germs and bacteria. The alcohol-based gel formula breaks down the skin's surface biofilm allowing the antimicrobial agent to attack and kill unwanted germs. Once sanitised, the aloe vera contained within the gel re-fats and heals damage done to the skin surface.

Product Information

Always ensure that precautionary measures found in the MSDS sheet for Sani-Gel are read and followed before use.

Key features and benefits of Sani-Gel?

- Kills full spectrum of harmful bacteria and organisms instantly.
- Halts the spread of potentially fatal illnesses.
- Effective against antibiotic resistant strains such as: Staphylococcus aureus (incl. MRSA), Escherichia coli, P. Aeruginosa, Salmonella typhi, Candida albicans, Trichophyton mentagrophytes, Listeria monocytogenes.
- Ideal for use in medical centres, nursing homes, hotels, leisure centres, industrial sites, schools, food preparation premises, golf courses and kennels.
- No water or cleaning cloths required, simply rub onto hands.
- Suitable for all skin types.
- Contains aloe vera to keep the skin supple and heal damage done to layers of skin through day to day wear and tear.
- Controlled rate of evaporation to ensure a kill of harmful bacteria.

How to get the best results?

Simply squirt a large pea size amount of Sani Gel onto the hands and rub into the skin. Allow to dry naturally.
