

LIQUID SILK SILICONE SPRAY

A high quality lubricant, release agent protective film and polish

Grease & Lubes

A high performance silicone with added shine.

What is Liquid Silk?

Liquid Silk is an amazing multipurpose silicone spray that can stop squeaks, polish leather and provide a non-stick water repellent surface for industrial, commercial and household purposes.

Liquid Silk is colourless and odourless and formulated to withstand temperatures up to 300°C.

Areas of use

As a lubricant and release agent to prevent sticking hinges, locks, bolts, and machinery parts.

Use Liquid Silk to give a protective shield for the easy removal of food, paint, adhesives, ink and more. The water repellent properties of Liquid Silk mean it can also be used to prevent corrosion on light bulb sockets and battery terminals. As a polish to bring a stunning shine to leather, wood, rubber and plastic.

Always ensure that precautionary measures found on the MSDS sheet for Liquid Silk, are read and followed before use.

Key features of Liquid Silk

Use as a lubricant, polish, water repellent and protector.

Colourless and odourless - Liquid Silk won't stain.

High temperature resistance of up to 300°C.

Can be used with an extension tube for hinge or machinery lubrication and as a spray for release and polishing tasks.

How to get the best results

When using as a polish or water repellent, simply spray onto surface and polish with a clean dry cloth. When using as a lubricant or release agent, use the extension tube to direct the product to the specific area. n.b. Take care not to allow overspray to create a slippery floor surface.
